

Length for Preferred Size Fish by Species for Angler Guide Table

These lengths designate what is considered the preferred size fish for each species. The Angler Guide table has a column titled "PREFER" which lists the percent of fish of this preferred size or bigger in the sample. For example, if the value in the PREFER column is 50 for white bass on Thunderbird, that means 50% of the white bass in the Thunderbird sample were 12 inches or larger.

White Crappie = 10 inches

Black Crappie = 10 inches
