

# 2010 August Roadside Quail Survey Summary

*Oklahoma Department of Wildlife Conservation*

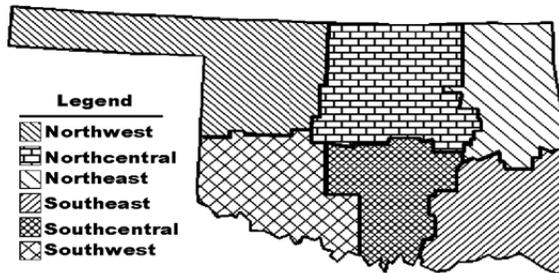

August surveys indicate quail populations may be down this year, but it is too early for this to be a definitive report. We really won't know the complete picture until October. We have some conflicting information from our survey results and field reports. For now, we will remain optimistic and wait for October surveys to give us a clearer picture of what to expect this fall.

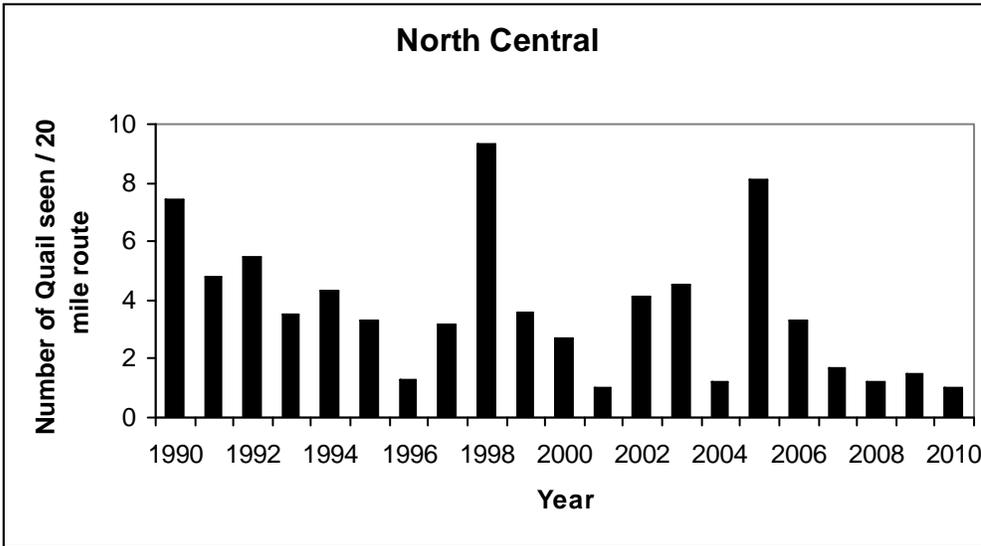

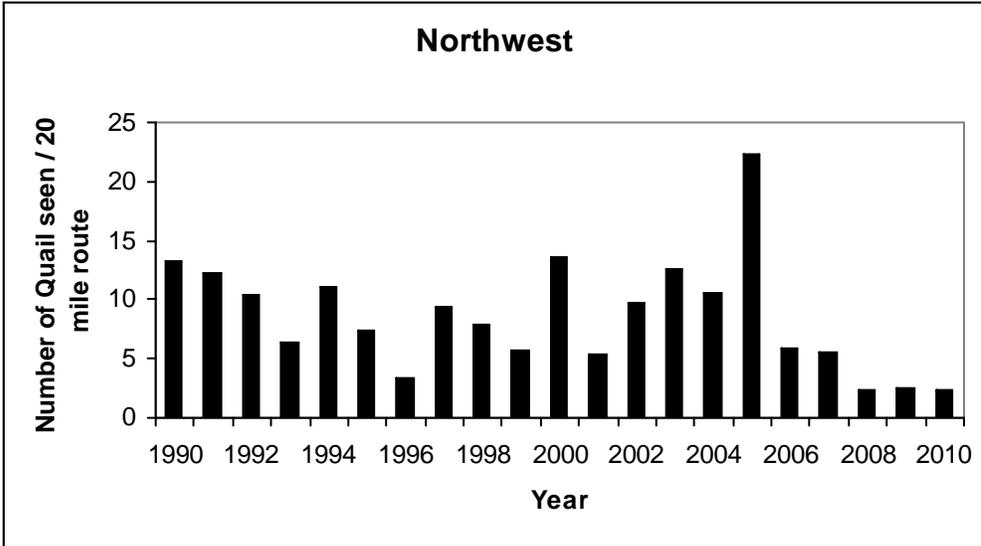

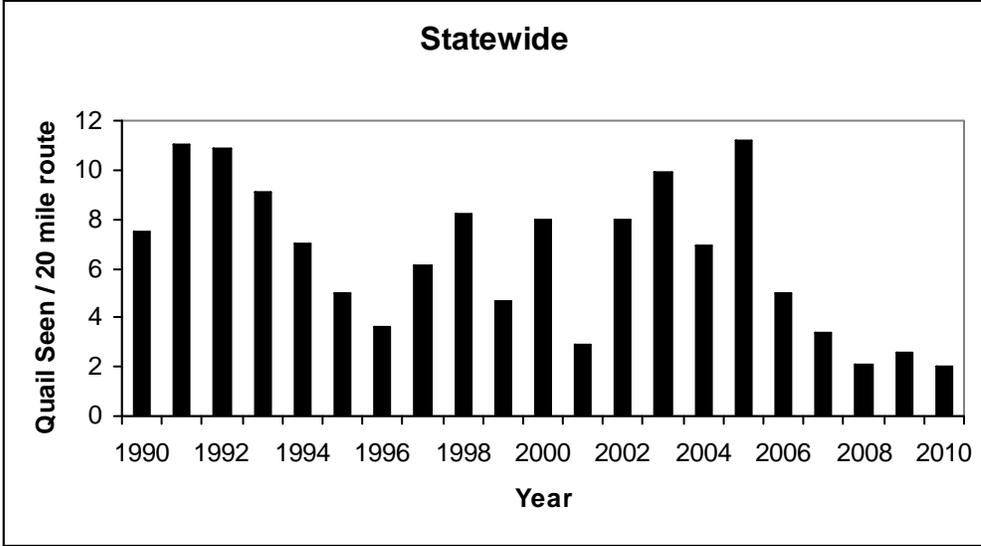

**Table 1. Quail seen/20 mile route during the August 2010 roadside surveys.**

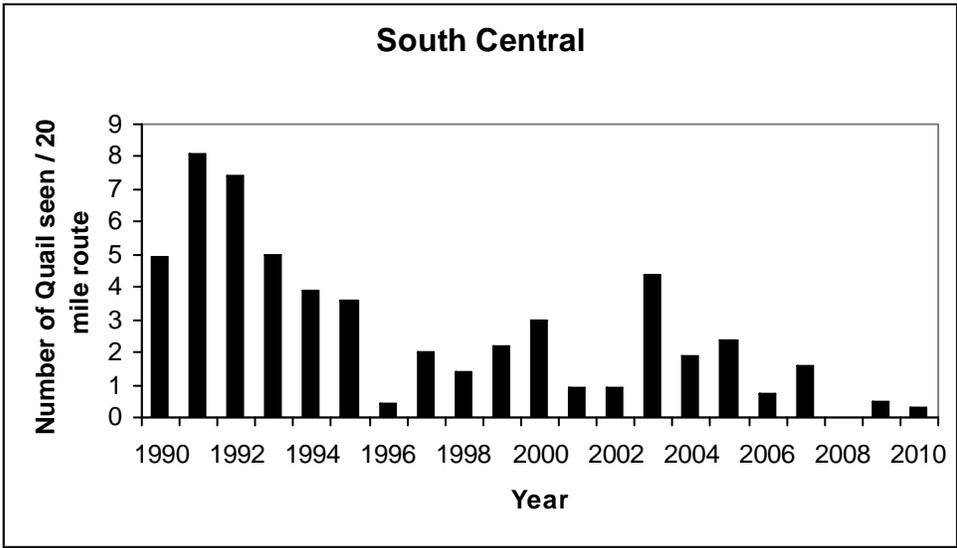

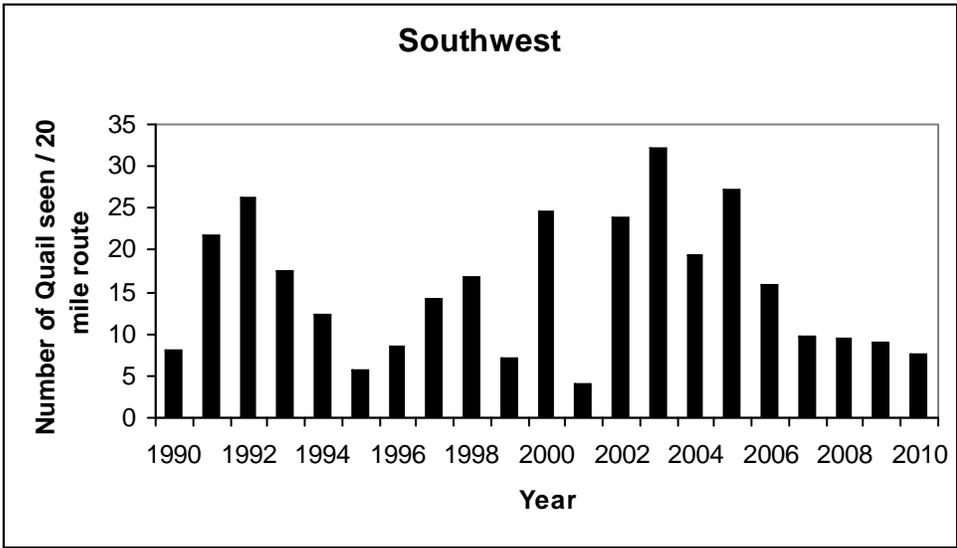

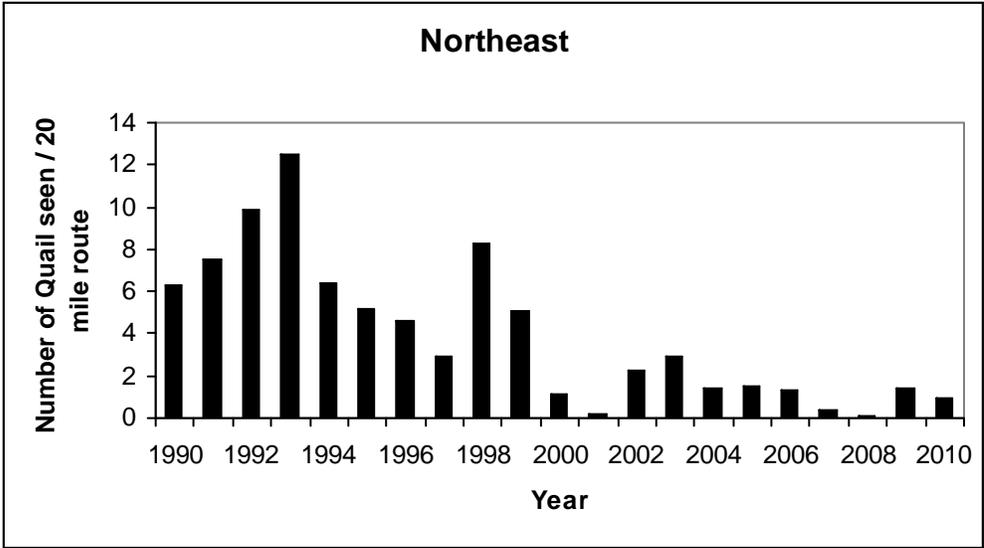

Region	Previous 20-yr. Average	2009	2010
Statewide	6.8	2.6	2.0
Northwest	9.1	2.6	2.3
North Central	4.0	1.5	1.0
Northeast	4.2	1.4	.9
Southwest	15.7	9.1	7.5
South Central	2.9	.5	.3
Southeast	5.9	1.1	.8
