Oklahoma City, OK 73152

EXPLANATION OF TERMS

- A.** Use a separate line for each species. Please list only species you have definitely identified. For example, do not list “wren” species; list instead if it is a Bewick’s wren, a Carolina wren, or a House wren.
- B.** Count only the attempts in which a nest was completed and at least one egg was laid. Do not include wren “dummy” nests.
- C.** A clutch is a completed nest with all eggs laid and incubation has begun.
- D.** Indicate total number of eggs by the listed species.
- E.** Indicate total number of young of the listed species that hatched.
- F.** A bird has fledged when it leaves the nest of its own power. Indicate total number of young of the listed species.

Additional Comments:

Remember to clean out nestboxes between nesting attempts and at the end of the season.
